Let's party! Holidays as Natural Experiments

Holidays can be used to examine the health effects of exposures that are impractical or unethical to study using prospective randomized trials. This approach may identify opportunities to improve population health. In this presentation, Dr. Staples will discuss recent and ongoing work that uses observational data to examine risk factors for injury. The talk will highlight a recent project examining traffic fatalities on Halloween and on the annual 4/20 cannabis celebration.

Dr. John A Staples, MD FRCPC MPH

Clinical Assistant Professor, University of British Columbia

Rounds are held weekly on Mondays from 12:00 pm to 1:00 pm in the VGH Research Pavilion, Room 700, 7th Floor, 828 West 10th Avenue, Vancouver, BC.

Visit www.C2E2.ca for information about previous and upcoming rounds. If you are interested in presenting please email pamela.lee@ubc.ca.
