Best Practices in Research Data Management

How do you manage your research data? Join us for a research data management workshop designed to help you incorporate best practices for data management in your own work. We will address such questions as - What file naming standard should I use? What is metadata, and how will it help me manage my data? What's a data repository, and which one should I use? Do I need permission to share data? How do I secure the data? In addition, we will discuss critical components of data management planning, provide hands-on practice with methods to name and organize files, review data management resources, and give you a framework to develop your own data management plan. We welcome all researchers; faculty, postdocs, graduate students, and others.

Eugene Barsky

Research Data Librarian with UBC Library

Scott Baker

Health Research Data Project Manager, UBC Advanced Research Computing

Rounds are held weekly on Mondays from 12:00 pm to 1:00 pm in the VGH Research Pavilion, Room 700, 7th Floor, 828 West 10th Avenue, Vancouver, BC.

Visit www.C2E2.ca for information about previous and upcoming rounds. If you are interested in presenting please email pamela.lee@ubc.ca.
