The Global Struggle to Save Antibiotic Therapy: How to Become a Resistance Fighter

OBJECTIVES:

1. To understand the epidemiology of antibiotic resistance and why it poses an existential threat to health care system sustainability.
2. To discuss general interventions required to meet the threat, with examples of Canadian innovation in the area.
3. To discuss the imperative for global engagement on the issue.

David Patrick

Professor, UBC School of Population and Public Health and Medical Epidemiology Lead for Antimicrobial Resistance at the British Columbia Centre for Disease Control

Rounds are held weekly on Mondays from 12:00 pm to 1:00 pm in the VGH Research Pavilion, Room 700, 7th Floor, 828 West 10th Avenue, Vancouver, BC.

Visit www.C2E2.ca for information about previous and upcoming rounds. If you are interested in presenting or attending remotely please email pamela.lee@ubc.ca.
